Capitol Connection Q&A for Contractors
By Shauna Krause, President, Capitol Services, Inc.

Let's break in with an alarming answer to get started. I will own up with an attorney asking a question, and help a General before wrapping up by opening a 'window' for an out of state contractor on siding...

Q: Now that I have my "C-10" (Electrical) license, do you know if I also need obtain an Alarm Company Operator license, or is this all covered when I got my "C-10"?

A: It is my understanding the alarm company operator licensed through the BSIS (Bureau of Security and Investigative Services) is for companies that install, maintain, monitor, and sell *burglar* alarm systems. *Fire* alarm work is covered with your "C-10" license.

Q: I am an attorney and I've used you for licensing assistance in the past. I have another client in the construction industry who wanted to know whether they need to remain an Owner of their business in order to remain a Responsible Managing Officer (RMO). I believe that as long as they remain an Officer of the company (i.e., President, Secretary or CFO), they can still be listed as the RMO even if they don't own any shares of the company, is that a correct interpretation?

A: Yes, you are correct. An RMO is not required to have any *ownership* in the Company unless he/she also qualifies another active license.

Q: I am working on getting the class "A" (General Engineering) license for our Company's operations. I have someone who has the class "A" (a former owner of an acquired company) who does not work for us currently. Is it allowed in CA for him to be the license holder even though he does not work for our Company or have a stake in the organization?

A: The qualifying individual on a license needs to either be an officer or an employee of the Company holding the license. Sometimes companies will bring on a qualifying individual as VP or something which classifies them as an officer, but they don't need to meet the hour requirement (Responsible Managing Employees are required to work at least 32 hours a week), and they don't need to collect a paycheck as an officer. However, even if you were to designate the 'A' qualifier with an officer title, he/she would still be responsible for overseeing work performed by your Company and managing the Company's construction activities.

Q: We are a Minnesota company and are looking to do some work for a large Development Company in CA. We need a contractor's license for windows and siding. What type of license do we need for that and how long does it take to obtain?

A: Thank you for contacting me. You would actually require a license with two classifications, a "C-17" (Glazing/Window) license, and a "C-61"/ "D-41" (Siding). The Glazing has a trade exam but the "C-61" classifications do not. You can only apply for one classification at a time so I would suggest you start with the "C-17" which will allow your Qualifier to take the Glazing trade and law exams, and then once the license is issued, you can add the C-61"/ "D-41" and your Qualifier *would not* need to take any exams (assuming you are using the same person for both classifications). Let me know if you would like our assistance with the process!

While knowledge is power, knowing where to go for the answers is half the battle. Get expert assistance immediately when you call 866-443-0657, email info@cutredtape.com, or write us at Capitol Services, Inc., 3609 Bradshaw Rd, Ste H, #343, Sacramento, CA 95827. Search past columns at www.cutredtape.com.

On October 4, 2023, Governor Gavin Newsom signed [SB 616](#), which arguably results in the most significant changes to California’s statewide paid sick and safe leave law since the Healthy Workplaces, Healthy Families Act (HWHFA) was first enacted in 2014.

Effective January 1, 2024, the amendment increases the number of job-protected paid leave hours employees can take each year under state law. When an employer implements an accrual and carryover policy, this change also increases how much paid leave employees can accrue and carry over from year to year. Likewise, when an employer uses a frontload policy, the amendment increases the amount of paid leave employers must annually frontload. Moreover, SB 616 extends *a few* HWHFA legal protections to certain unionized employees who are not currently covered by the HWHFA (and will continue *not* to be covered aside from these limited rights).

Additionally, the amendment to the HWHFA establishes greater uniformity statewide concerning *some* aspects of paid sick and safe leave via partial preemption of local ordinances. While employers with operations in multiple California cities may welcome this particular change, the impact of the new limited preemption provision remains to be seen.

Finally, the law affects how companies can comply with the law via existing paid leave policies, tweaks standards in some lesser-known parts of the HWHFA, and makes “official” exclusions from the law that were established in a legal challenge that made its way through the courts. Arguably, the changes will most affect employers *not* currently subject to local ordinances requiring paid sick and/or safe leave, or other types of paid time off.¹ However, even employers already subject to one or more local laws might feel SB 616’s effect; if not immediately, eventually.

Accrual, Carry-Over, Frontloading, and Use Caps: Currently, an employee’s banked, accrued paid sick and safe leave may be capped at 48 hours or 6 days – whichever is greater. Due to SB 616’s amendments, the amount will increase to the greater of 80 hours or 10 days. California’s accrual limitation is unique in that it is not a finite annual or overall cap, but rather a temporary one, *i.e.*, once an employee accumulates an amount of leave that equals the “cap” amount, they stop accruing but can immediately restart accruing leave when they use leave and their banked amount falls below the cap. The temporary accrual cap also practically functions as a cap on the amount of unused leave employees can carry over from one year to the next. This is because under the HWHFA “[a]ccrued paid sick days shall carry over to the following year of employment.”

In lieu of carryover, however, the HWHFA allows employers to frontload a specific amount of paid leave each year. Currently, the law requires employers to frontload 24 hours or 3 days – whichever is greater – but under SB 616 that amount will increase to the greater of 40 hours or 5 days. It is important to note that while state law allows employers to frontload leave annually and avoid carryover, that is not always the outcome under similar local ordinances throughout California. Under some local laws, employers may still need to carry over frontloaded leave because that is what the ordinance expressly requires or because the jurisdiction treats any “frontload” as an advance on accrual.

SB 616’s changes also impact two related HWHFA provisions that are less commonly discussed with regard to California’s paid sick and safe time law. First, in lieu of using the standard one leave hour for every 30 hours worked accrual rate, the current version of HWHFA allows employers to use a different accrual rate so long as employees accrue leave on a regular basis resulting in them having no less than 24 hours of accrued leave by the completion of their 120th day of employment and having that same amount by the completion of the 120th day in each subsequent year. SB 616 changes this accrual

exception to require that, additionally, employees have accrued no less than 40 hours of leave by the 200th day of employment and that same amount by the 200th day in each subsequent year.

Second, when frontloading is used to comply with paid sick and safe time obligations, many paid sick and safe time laws require the frontload distribution to occur when employment begins, *i.e.*, on day 1. California's existing state law, however, allows employers to provide no less than 24 hours or 3 days of paid leave for the employee to use by the time they complete their 120th day of employment. Essentially, this option allows employers to impose a lengthier waiting period for new hires when frontloading is used than what the HWHFA otherwise allows (an 89-day waiting period, per the state labor department) when accrual is used. As a result of SB 616, in addition to providing the frontloaded 24 hours/3 days of paid leave by the 120-day mark, employers must also ensure that the employee has no less than a total of 40 hours or 5 days of paid leave (between the initial 120 day frontloading and the subsequent 200 day frontloading) for the employee to use by the time they complete their 200th day of employment. This adds another interesting twist that we do not see with other paid sick and safe time laws: the ability to provide the frontloaded amount in a piecemeal fashion rather than provide the entire amount at one time.

Currently, the HWHFA allows employers to limit employees' paid leave use per year to 24 hours or 3 days, whichever is greater. SB 616 increases the permitted annual use cap to the greater of 40 hours or 5 days.

Covered & Not Covered Employers and Employees. Currently, the HWHFA does not apply to employees covered by a valid collective bargaining agreement (CBA) if the CBA expressly provides for employees' wages, hours of work, and working conditions; provides paid sick days, paid leave or paid time off; requires final and binding arbitration of disputes concerning paid leave; provides premium wage rates for all overtime hours worked; and establishes a regular hourly rate of pay of not less than 30 percent more than the state minimum wage rate. SB 616's amendments, however, extend *some* of the HWHFA's protections to these particular employees:

- *Covered Uses:* The CBA must allow paid leave to be used for diagnosis, care, or treatment of an existing health condition of, or preventive care for, an employee or family member. Additionally, if an employee is a victim of domestic violence, sexual assault, or stalking, the CBA must allow paid leave use to: obtain or attempt to obtain any relief, including, but not limited to, a temporary restraining order, restraining order, or other injunctive relief, to help ensure the health, safety, or welfare of the victim or their child; for medical attention for injuries; to obtain services from a domestic violence shelter, program, or rape crisis center; for psychological counseling; and to participate in safety planning and take other actions to increase safety from future domestic violence, sexual assault, or stalking, including temporary or permanent relocation.
- *Replacement Worker Prohibition:* As a condition of taking paid leave for a covered reason, employers cannot require an employee to search for or find a replacement worker to cover the day(s) they will be absent from work.
- *Anti-Retaliation:* Employers cannot deny an employee the right to use sick days, or discharge, threaten to discharge, demote, suspend, or in any manner discriminate against an employee for using or attempting to use sick days; filing a complaint with the state labor department or alleging a violation of the HWHFA; cooperating in an investigation or prosecution of an alleged HWHFA violation; or opposing any policy or practice or act that the HWHFA prohibits. A rebuttable presumption of retaliation applies if an employer takes prohibited action within 30

days of the employee's filing of a complaint with the state labor department or alleging a violation, cooperating with an investigation or prosecution of an alleged violation, and/or opposing an unlawful policy, practice, or act.

Additionally, SB 616 excludes employees and employers covered by the federal Railroad Unemployment Insurance Act (RUIA). Essentially, this change expressly incorporates into the law the outcome of litigation against the state by the rail industry, which successfully argued that the RUIA preempted California law.

Partial Preemption of Local Standards: SB 616 adds new subdivision (r) to California Labor Code section 246, which provides that "Subdivisions (g), (h), (i), (l), (m), and (n) [of section 246] shall preempt any local ordinance to the contrary." Generally, these subdivisions cover the following obligations or practices:

- *End of Employment & Reinstatement:* Employers need not cash out unused paid sick and safe leave when employment ends but must reinstate such unused leave for employees rehired within one year of the date of separation unless leave was cashed out.
- *Advance Leave:* At their discretion and with proper documentation, employers can advance leave to employees before they accrue it.
- *Paystubs:* The amount of paid leave available for HWHFA sick and safe time use must be on an itemized paystub or in a separate writing provided on payday.
- *Rate of Pay:* The standards employers must use to calculate the rate of pay for paid sick and safe time use for employees who are non-exempt and exempt (which the state labor department limits only to those subject to the executive, administrative, and professional exemption).
- *Employee Notice:* How much notice employees must provide their employer for foreseeable and unforeseeable absences.
- *When Leave Must Be Paid:* Employers must compensate employees for paid sick and safe leave they use by the payday for the pay period *after* the pay period in which the employee uses leave.

Although hearing the word "preemption" might cause some ears to perk up, practically speaking the preemption is likely to have a limited effect. For example, no local ordinance requires employers to cash out unused paid sick and safe leave when employment ends. Only two ordinances discuss advancing leave; one contains language identical to state law and the other was not so different that employers struggled to harmonize state and local requirements. There is only one local ordinance with a paystub requirement and it is identical to state law. Although there are a few instances in which an employer might need to determine whether state or local law provides the more beneficial pay rate calculation, and apply that standard when compensating an employee when they use leave, state law already is often the more employee-friendly calculation. Given the rate of pay calculations for those other than exempt executive, administrative, or professional employees can be challenging mathematically, the benefit of a uniform standard might be seen less favorably because of increased costs it might generate. As there is little deviation between state law and the local ordinances concerning advance notice employees must provide to use leave, not much should change. Finally, concerning the timing of providing pay for paid sick and safe leave use, of the local ordinances that expressly address the issue – not all do – all already use the same timeframe as state law. Assuming a local jurisdiction whose law is silent on the issue were to suggest that payment was due earlier, then SB 616 would have the effect of setting a consistent standard statewide.

Using Existing Policies: SB 616 amends the HWHFA provision concerning so-called “grandfathered plans.” When the HWHFA was enacted in 2014 – it became effective the next year – employers did not need to provide additional paid leave if they had a paid sick or paid time off plan in effect before January 1, 2015 that included leave employees could use for the same reasons and under the same conditions as the HWHFA requires, subject to a few additional requirements, like employees being able to accrue no less than one day or eight hours of paid leave within three months of each year, and employees being able to earn at least three days or 24 hours of paid leave within nine months of employment. Moreover, per the “grandfather clause,” if an employer modifies accrual standards in its policy after January 1, 2015, it needs to either adhere to the HWHFA’s accrual standards or frontload the amount the HWHFA requires *unless* the employer *increases* its policy’s accrual amount or rate. As with annual use caps, SB 616 amends this provision to increase the amount of leave employees must be able to accrue from three days or 24 hours to 5 days or 40 hours. Additionally, it accelerates the timeframe for them to accrue that amount of leave from within nine months of employment to within six months of employment. For unknown reasons, the “grandfather clause” continues to reference January 1, 2015, instead of January 1, 2024. If leaving in the 2015 date is intentional, that might raise concerns about retroactivity given amendments are meant to be prospective “unless expressly so declared” by the legislature, which did not occur in SB 616. Another possibility, however, is that the 2015 reference is an unintentional oversight, as SB 616 was amended multiple times throughout the legislative process, and that when they return in 2024 legislators will retroactively change the 2015 reference to 2024.

Next Steps. For employers whose paid leave benefits do not already meet, or exceed, SB 616’s requirements, there remains limited time to review and revise policies and practices, adjust payroll standards, and educate employees on enhanced benefits or protections. Employers are not the only party fighting the clock, however. The eight local jurisdictions with existing paid leave ordinances do not have a lot of time to determine whether, and how, to respond to SB 616’s partial preemption. All, of course, will be looking for guidance from the state labor department, which itself will be pressed for time to educate stakeholders on how this enacted bill, and countless others new or amended laws, will impact the Golden State in 2024.

California’s Paid Sick Leave Requirements Increased Effective 2024

By [Susan E. Groff](#) & [Julia A. Olivier](#) on October 4, 2023

POSTED IN [PAID SICK LEAVE](#)

Payroll employment rises by 336,000 in September; unemployment rate unchanged at 3.8%

Total nonfarm payroll employment rose by 336,000 in September, and the unemployment rate was unchanged at 3.8 percent. Job gains occurred in leisure and hospitality; government; health care; professional, scientific, and technical services; and social assistance.

Aug. sees higher construction spending

Construction spending increased 0.5% in August, driven by single-family and multifamily housing, according to Commerce Department data. Spending on public construction increased 0.6%, with federal government projects up 7.8%, while spending on private construction increased 0.5%. **Full Story:** [Reuters](#)

Construction job gain a bright spot in Sept. economy

Construction jobs and pay increased last month, according to ADP, offering a bright spot among mixed economic indicators. Construction's gain of 16,000 jobs contrasted with losses in other industries, and other categories of activity across the services and manufacturing sectors varied from growth to contraction. **Full Story:** [For Construction Pros](#)

FHWA outlays \$61B for states, others for fiscal 2024

The Federal Highway Administration plans to distribute \$61 billion through 12 programs in fiscal 2024. The infrastructure funding gives states, Puerto Rico and Washington, D.C., "flexibility they need to determine how to allocate funds for a range of transportation projects," FHWA Administrator Shailen Bhatt says. **Full Story:** [The Construction Broadsheet](#)

DOT rolls out \$1.4B for 70 rail upgrade projects

[Seventy](#) passenger and freight rail projects across 35 states and the District of Columbia stand to benefit from more than \$1.4 billion awarded by the Transportation Department. The funding comes from the bipartisan infrastructure law and the Consolidated Rail Infrastructure and Safety Improvements program and serves to upgrade tracks, grade crossings and bridges. **Full Story:** [Engineering News-Record \(tiered subscription model\)](#) [Railway Age](#)

Megaprojects seen sapping resources for others

Generators, electrical switch gears and other essential components are proving harder to find and are taking as long as two years to obtain for many projects, according to a report by Cushman & Wakefield. The difficulty is attributed to a boom in multibillion-dollar federal infrastructure projects and in net-zero projects, a surge that is cutting into the labor pool and affecting opportunities for growth for some companies. **Full Story:** [Construction Dive](#)

Citi CEO says economy headed for soft landing

Citigroup CEO Jane Fraser says corporate leaders have told her demand is softening, which might help the Federal Reserve with its battle against inflation. "We are paying attention to the lower FICO consumer, where there are cracks," Fraser says. Fraser expects another interest-rate increase in November but hopes there is no need for it and sees the economy heading for a soft landing. "The recession, if there is one, is going to be very manageable," Fraser says. Regarding Citi's recent reorganization, Fraser says fourth-quarter earnings will disclose the scope of job cuts and expense savings. **Full Story:** [CNBC](#) [Reuters](#) [Financial Times](#)

Report gets a grip on embodied carbon

Embodied carbon and measures to minimize it are discussed in a report from the US Green Building Council and RMI. The [Driving Action on Embodied Carbon in Buildings](#) report explores the state of embodied-carbon data, how to reduce carbon with standard building practices and the carbon intensity of various materials. **Full Story:** [US Green Building Council](#) [RMI](#)

Bill envisions clean energy corridors on Calif. highways

Highways lined with solar are becoming a big thing in many states, but California may go a step further with SB 49. The measure sitting on Gov. Gavin Newsom's desk would direct the state Department of Transportation to evaluate opportunities for not only co-located renewables, but also transmission and distribution infrastructure. This piece explores the use of solar along highways in the US and how California could shake things up with clean energy corridors. **Full Story:** [Canary Media](#)

EPA provides definition of zero-emissions building

The Environmental Protection Agency has released an outline for zero-emissions building. The outline is based on three pillars: no on-site emissions, use of 100% renewable energy and compliance with energy-efficiency guidelines. **Full Story:** [Popular Science](#) [The Washington Post](#)

Report: Damage to underground infrastructure growing

The past three years have seen growing damage to underground infrastructure, according to the [2022 Damage Information Reporting Tool report](#) from the Common Ground Alliance. The report documents key damage indicators across the US and Canada, with damage on the rise as excavation increases. **Full Story:** [Underground Infrastructure](#)

How smaller contractors should approach technology

Small and midsize contractors contemplating adding technology should begin by identifying which functions need the most help, says Jit Kee Chin, chief data and innovation officer at Suffolk Construction. In an interview, Chin offers further pointers and shares Suffolk's experience in overcoming difficulties in tech adoption. **Full Story:** [Construction Dive](#)

26 US laws waived to build Texas border wall

Plans for a border wall in Starr County, Texas, are proceeding with the Biden administration's waiver of 26 federal laws. The action eliminates the need for lengthy reviews and avoids lawsuits to address "an acute and immediate need to construct physical barriers and roads ... to prevent unlawful entries into the United States in the project areas," says Department of Homeland Security Secretary Alejandro Mayorkas. **Full Story:** [The Associated Press](#)

OSHA cracks down on exposure to silica dust

Employers are facing an enforcement effort to protect workers from lung-endangering exposure to silica dust under an OSHA initiative. The agency is sending fact sheets to relevant employers with advice on controlling silica dust, providing information such as pointers on safer work practices for manufacturing, finishing and installation. **Full Story:** [For Construction Pros](#)

Data center construction at record high in N. America

A record amount of data center construction is underway in North America, driven largely by interest in AI, according to a CBRE report. Supply has risen 19.2% during the past year, despite power concerns, with Northern Virginia and the area of Dallas and Fort Worth, Texas, the most active regions. **Full Story:** [Building Design+Construction](#)

Low-carbon concrete required for all construction in N.Y.

New York will require all concrete used in state-funded construction or transportation projects to meet low-carbon standards in a move advocates say is an opportunity for the state to lead the country as it moves toward a goal of net-zero carbon emissions by 2050. Beginning in 2025, concrete producers have to provide data for their materials' lifetime impact on the environment in guidelines for greenhouse gas emission limits that are a first in the nation, the governor's office said. **Full Story:** [Bloomberg Law](#) [Finger Lakes Daily News \(N.Y.\)](#)

USACE offers \$7.5B in lending for dam safety projects

Dam safety projects stand to benefit from a \$7.5 billion loan program announced by the Army Corps of Engineers. The low-cost lending is available for projects topping \$20 million to cover as much as 49% of the cost or as much as 80% in disadvantaged communities. **Full Story:** [The Construction Broadsheet](#)

Chula Vista, Calif., mandates project labor accords

The Chula Vista, Calif., City Council has decided to mandate project labor agreements for projects of at least \$1 million on city property and for affordable housing developments that get at least \$5 million in city funding. The City Council has also agreed to continue talks with the San Diego County Building and Construction Trades Council to standardize project labor agreements for major developments. **Full Story:** [The San Diego Union-Tribune \(tiered subscription model\)](#)

\$298.3M project begins for I-605 in Calif.

Construction on the first of three segments of the \$298.3 million Super 605 Freeway Enhancement Project has begun in California. The work brings extensive upgrades to Interstate 605 between Long Beach and the San Gabriel Valley, with pavement improvement expected to last 40 years. **Full Story:** [Los Angeles Daily News](#)

Cost rises to \$12.2B for 6.1-mile BART extension

The estimated cost of a plan by California's Bay Area Rapid Transit to extend 6.1 miles to downtown San Jose has risen to \$12.2 billion from \$9.3 billion. Additionally, the estimated date of completion has changed to 2036, three years later than previously predicted, according to the Santa Clara Valley Transportation Authority, overseer of the project. **Full Story:** [San Francisco Chronicle \(tiered subscription model\)](#)

First phase of UC San Diego Health project hits midpoint

Construction that began in late 2021 has reached the halfway mark in the first phase of UC San Diego Health's nearly \$3 billion Hillcrest campus expansion. DPR Construction manages the phase, which includes a 250,000-square-foot outpatient center and a nine-story parking structure. **Full Story:** [KFMB-TV \(San Diego\)](#)

INTRODUCTION

Whether an employee is driving a commercial vehicle or a passenger vehicle, they have a responsibility to avoid distractions while driving. Driving comes with an inherent risk, but the risk of driving increases when distractions are added to the equation. Distracted driving is one of the biggest contributors to vehicle accidents that occur every day.

TYPES OF DISTRACTIONS

The three types of distractions include:

- Visual
- Manual
- Mental (Cognitive)

VISUAL DISTRACTIONS

Visual distractions cause drivers to take their eyes from the road for more than a couple of seconds. Visual distractions include:

- Changing radio stations
- Checking and adjusting GPS systems
- Looking for items on the floor of the vehicle
- Applying cosmetics
- Adjusting the air conditioning or heat in the vehicle
- Looking at a passenger

MANUAL DISTRACTIONS

Manual distractions cause drivers to take one or both hands off of the wheel, which may result in losing control of the vehicle or a delay in reaction time. Manual distractions include:

- Eating and drinking
- Smoking
- Using a cell phone (texting, watching videos, checking social media, etc.)
- Reaching for items (this includes searching through a purse or wallet)

COGNITIVE DISTRACTIONS

Cognitive distractions cause drivers to shift the mind's focus from the road to other things. Cognitive distractions include:

- Talking on the phone, other communication device, or with another passenger
- Road rage
- Daydreaming

DRIVING: DISTRACTED DRIVING

- Thinking about something that is upsetting
- Being under the influence of drugs or alcohol

HOW TO AVOID DISTRACTIONS WHILE DRIVING

NOTE: Employees should adhere to their company's cell phone and other portable communication device policies when driving commercial vehicles or company-owned passenger vehicles. Employees should adhere to all local and federal laws regarding cell phone use.

To help avoid distractions while driving, employees should do the following:

- Take care of any adjustments (mirrors, air conditioning, seats, radios, etc.) before leaving the parking area or at roadside stops.
 - Employees with communication radios should ensure that their radio is in a place that is easy to reach. Radio talk should be kept as short as possible.
- Ensure that addresses and destinations have been put into GPS systems prior to driving.
- Read and fill out all paperwork before driving. Paperwork can wait until you are off the road.
- Create a voice message on cell phones that states that you are currently driving and will call back when it is safe to do so.
- Do NOT text, talk, check social media, watch videos, or check email on your cell phone while driving. Cell phones should be put in a safe place before getting on the road. Text, calls, and emails can wait until you are off the road.
- When possible, do NOT eat or drink while driving. If you are hungry, pull off the road and go inside to eat or eat in your vehicle while parked in a parking area. If you have no other option other than to eat or drink while driving, only drink fluids that come with a lid from which you can drink (coffee, soup, etc.) and avoid messy foods (tacos, hamburgers, chili, etc.).

CONSEQUENCES OF DISTRACTED DRIVING

Drivers who cause an accident due to distracted driving can face multiple consequences. Such consequences include:

- Suspension or loss of a license
- Heavy fines to both the employee and company
- Criminal charges (including prison time)
- Paying liability to victims
- Death

CONCLUSION

Distracted driving is dangerous to both employees and the public. Drivers have enough to focus on when driving that distractions such as cell phones, paperwork, and eating can wait until the driver is in a safe place to take care of those obligations. Employees should adhere to their company's driving policies when operating a commercial vehicle or company-owned passenger vehicle. Employees are responsible for adhering to all local and federal motor laws.

Plumas National Forest Hazard Tree Stewardship

Addenda: 0

11/2/23 2:00 PM 23-03315 Quincy

Prebid Conf: **read note in description

PROJECT DOCUMENTS WILL BE RELEASED SOMETIME AFTER 10/12/23, DOCS POSTED CURRENTLY ARE "DRAFT DOCS" AND THE BID DATE SHOWN IS FOR PLACEHOLDER PURPOSES, ONCE DOCS ARE ISSUED WE WILL UPDATE THIS LISTING

The objectives of this project are to perform mitigation treatment of standing and downed fire-killed fuels along and adjacent to roads and recreation sites within the North Complex Fire of 2020 and Dixie and Beckwourth Fires of 2021. Mechanically remove unmerchantable trees and small diameter hazardous fuels along roadsides to landings to be later burned by FS or chipped/removed from contract area. Fall and leave on slopes over 35 percent slope. Decking and Processing of merchantable trees over 24 inch dbh is required in Mandatory Items 2 and 3 (Beckwourth and Mount Hough Districts), and if awarded Optional Items 2 and 3. Remove product per Timber Subject to Agreement if awarded

**The Feather River Ranger District site visit will be held on October 18, 2023, at 10:00 am with a meeting location at Oro-Quincy Highway (BC 119) and French Creek Road (BC 496 65A) intersection. We will look at the mandatory units 1-6. The Mount Hough/Beckwourth Districts site visit will be held on October 19, 2023, at 10:00 am with a meeting location at 26N92 road and 26N70 road intersection (entrance to Conklin Park Campground).

Bidders:

Tree Pro Tree Service, Inc. Tree Service Office: 916-659-0625

Spirit G - Z Stewardship IRSC Plumas National Forest

Addenda: 1

11/9/23 4:00 PM 23-03230 Quincy

Prebid Conf: 9/27 @ 9 AM (Meeting spot will be at the junction of Hwy 70 and Forest Service road 23N22 (Fells Flat rd) at the CalTrans Gravel shed. Please RSVP with Zach Wood at zachary.wood@usda.gov if you plan to attend, by September 26th.)

PRE-BID CONFERENCE 9/27 @ 9 AM for viewing the EAST side (Meeting spot will be at the junction of Hwy 70 and Forest Service road 23N22 (Fells Flat Rd) at the CalTrans Gravel shed. Please RSVP with Zach Wood at zachary.wood@usda.gov if you plan to attend, by September 26th.) 10/11 @9 Am for viewing the WEST side portion. The meeting spot will be in the town of Laporte CA.

The project incorporates all three Ranger Districts across the Plumas National Forest. Near the communities of Challenge, La Porte, Quincy, Cromberg, Blairsden/Graeagle, and Portola, CA. The intent of the project is to increase the pace and scale of forest restoration treatment by reducing conifer encroachment, competition, stand density, fuel loading, and ladder-fuels to increase forest stand health and to mitigate risk of catastrophic wildfire.

Sierra County

NEW Regional Transportation Plan 2025

Addenda: 0

10/27/23 5:00 PM 23-03387 Downieville

The Sierra County Transportation Commission (SCTC) is soliciting proposals from qualified consulting firms to prepare the 2025 Regional Transportation Plan (RTP) and preparation of related environmental documents for the RTP. The 2025 RTP will be an update to the SCTC's 2020 RTP and shall be compatible with the Sierra County General Plan, Circulation Element, City of Loyalton General Plan, Bicycle Transportation Plan and other City and County planning documents. The 2025 RTP shall meet the 2023 RTP Guidelines as adopted and amended by the California Transportation Commission.

Yuba County

Hydrilla Mitigation Project - Water Tank

Addenda: 0

11/1/23 2:00 PM 23-03310 23-0089 Oregon House

Prebid Conf: MAND 10/11/23 @10:00 AM

To abandon the existing agricultural pond, backfill the pond, and replace its function with a 200,000-gallon bolted steel tank with appropriate piping hookups, filters, and controls in the location of the existing pond. In addition, the storm ditch immediately above the pond must be cleared of vegetation and graded smooth to avoid propagation of the hydrilla plant.

**Written questions must be received by 10/18 no later than 4:00 PM
